

INSTRUCTION ON HOW TO WORK ON THE E-NEWS PROJECT

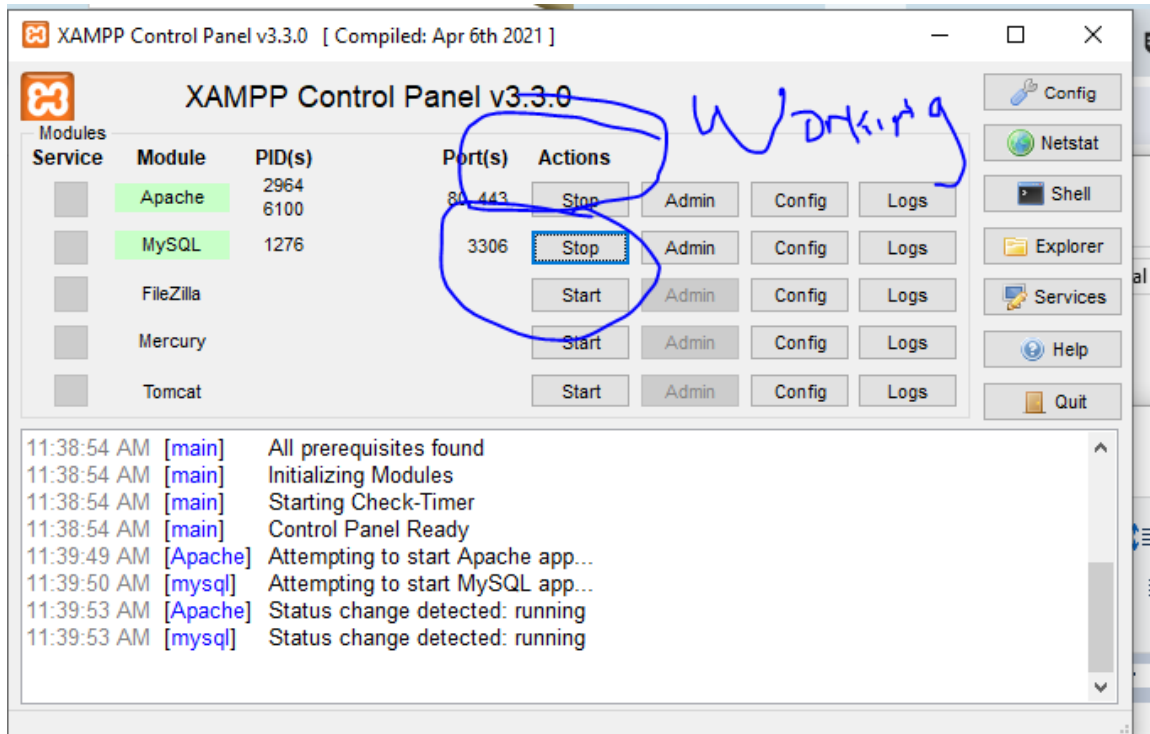

1. Locate the project files:

Find the folder named "e-news-file-cleanup" and unzip it if necessary.

2. Start XAMPP:

Open the XAMPP application and turn on Apache and MySQL. These are the services needed to run the project's database locally.

if you encounter sql error then your serve is OFF, go xampp and click on start

3. Open Git Bash:

Inside the unzipped project folder, right-click anywhere on the screen and select 'Open Git Bash Here'. This will open a terminal window specific to the project location.

4. Start the Laravel server:

In the Git Bash terminal window, type ``php artisan serve`` and press Enter. This command starts the Laravel server, which will host the project locally.

```
Essential log@DESKTOP-JMP9BCP MINGW64 /c/Adewale/e-news-file-cleanup (master)
$ php artisan serve

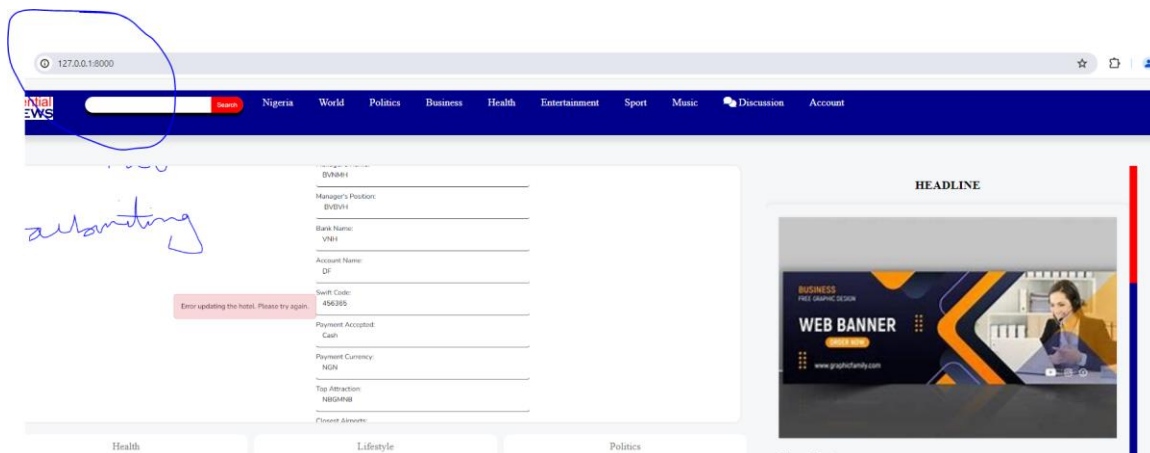

INFO Server running on [http://127.0.0.1:8000].
Press Ctrl+C to stop the server

2024-04-26 13:01:19 .....
2024-04-26 13:01:19 /favicon.ico .....
2024-04-26 13:01:20 .....
2024-04-26 13:01:21 /favicon.ico .....
2024-04-26 13:01:23 .....
2024-04-26 13:01:23 .....
2024-04-26 13:01:23 .....
2024-04-26 13:01:23 .....
```

Ctrl + C won't work incase you want to copy the url from the terminal, you can right click and click on copy from the option or type the url directly in your preferred browser.

5. Access the project:

Once the server is running, you'll see a URL like `http://127.0.0.1:8000/` displayed in the terminal. Copy this URL and paste it into your preferred web browser's address bar.

6. Explore the project:

You should now be able to explore the e-news project in your browser. Navigate through the different pages and features to understand how the project works.

7. Need help?
